***Allowance of Application # 09/808,786***

1. The following communication is in response to applicant's amendment received 7-April-2005.

***Examiner's Amendment***

2. An Examiner's Amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 C.F.R. 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the Issue Fee.

**2.1 In the Claims:**

claim 9        line 35 Change "including; manufacturing" to –including manufacturing--.

***Reasons for Allowance***

3. The following is an Examiner's Statement of Reasons for the indication of allowable subject matter. The instant application is directed to a non-obvious improvement over the inventions described in the related prior art, specifically the articles authored by: Heavlin et al., entitled *Columnwise Construction of Response Surface Designs*; Wynn, entitled *The Sequential Generation of D-Optimum Experimental Designs*, and Schank et al., entitled *An Introduction to Microelectronics Manufacturing and Markets*. The improvement comprises a method for designing experiments for acquiring processing experience in the design and manufacture of a

product (i.e. a semiconductor device), wherein critical variables of the product are determined, and a plurality of matrices and algorithms are repeatedly utilized to create a best solution design matrix used to manufacture prototype wafers. This patentable distinction is included in each of the independent claims, nos. 1 and 9. The art of record, either individually or in combination, fails to teach, suggest, or render obvious the useful, concrete and tangible <manufacture of semiconductor device by designing experiments for acquiring processing experience in the design and manufacture of a product> having the corresponding structure which is disclosed in the specification and equivalents thereof at least at page 4, line 15 through page 19, line 10, and Figures 1-4. In view of the foregoing, the claims of the present application are found to be patentable over the prior art.
